

Quick Start Overview: Magic and Mayhem

Magic and Mayhem is a cooperative tabletop dungeon crawler designed for rapid, hilarious gameplay without the need for a Dungeon Master (DM).

1. Setup

- **Dungeon Layout:** Choose **9–12 cards** or more for a longer session. Ensure the **Entrance**, **Boss** and **Store** tiles are included.
- **Grid:** Shuffle and lay tiles face-down in a grid with the **Entrance** card on the edge.
- **Characters:** Each player picks a character and figurine, then gathers **HP (life tokens)** matching their character sheet's HP value..
- **Start:** Place figurines on the flipped Entrance tile. The youngest player goes first. Play goes counterclockwise.

2. On Your Turn

Follow these four steps in order:

1. **Move:** Move up to your **MOV** value (plus modifiers). Flip adjacent tiles over as you reach the edge of your current tile.
2. **Action:** Attack, unlock a door, or cast a spell.
3. **Bonus Action:** Perform any extra actions granted by special cards or abilities.
4. **Encounter:** If you land on or next to an **(E)** square, roll the die.

3. Encounters & Combat

When a player lands on or next to an (E) symbol, do the following:

- **Roll 1–3:** Draw a **Monster card** - follow the instructions on the card.
- **Roll 4–6:** Draw a **Treasure card** - follow the instructions on the card.
- **Combat:** Use your **DAM** value to remove life tokens from monsters within range.
- **Revival:** If you lose all HP, roll a **4+** to revive with 1 HP.
- **Physical Challenges & Riddles:** Some encounters require the group to solve a riddle or complete a physical task (like a "Sock Carry" or "Floor is Lava") to succeed.

4. Monsters' Turn

- Move monsters toward the closest player according to their MOV value.
- Monsters attack by removing life tokens from 1 player in range according to the monster's DAM value.
- If there is more than one player in range, see the rulebook for how to decide who gets damage.

5. Abilities & Gear

- **Color Matching:** Characters have colored dots (e.g., Sparkles the Faerie has purple and blue). You can only use items or spells that match your character's ability colors.
- **Trading:** You can give or trade items to players on the same map tile (uses 1 Action).
- **The Store:** Exchange gold for items like health potions, weapons, or keys. Available items and prices are in the rule book.

Player Abilities	
	Strong Magic
	Adept Magic
	Heavy Weapons
	Light Weapons
	Epic Skills
	Adept Skills

5. How to Win

Find the **Boss tile**, defeat the Boss, and return to the **Entrance** to escape with your loot.
